

STAAR Online Features & Supports Checklist

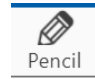

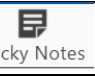

This checklist can be used to track students' progress as they familiarize themselves with the features and supports available as part of the STAAR online assessment. Mark the dates of practice and add an X when the student can complete the task proficiently (or NA if not applicable).

Note: Not all of the designated supports are available on all tests. For more information see the [Accessibility within the STAAR Program Educator Guide](#).

Student Name: _____ Grade: _____ STAAR Online Tests: _____
